## PERFORMANCE SIMULATIONS

*Société Générale has processed a series of future performance simulations in order to demonstrate how the product may perform in the future. The exact parameters of the product were tested in 3 theoretical market scenarios formulated by Société Générale using projections of how markets may perform in the future. The simulations presented result from estimations of Société Générale at a given time, on the basis of parameters selected by Société Générale, the market conditions at such time and historical data which can in no way be considered as a reliable indicator of future performance. Therefore, these results only have an indicative value.*

	Positive scenario	Neutral scenario	Negative scenario
Probability, on average, of Redemption > Issue Price	93.47%	75.80%	47.44%
Probability, on average, of Redemption = Issue Price	0.00%	0.00%	0.00%
Probability, on average, of Redemption < Issue Price	6.53%	24.20%	52.56%
Percentage of simulations where the max return has been generated	2.83%		
Average maturity of future performance simulations	1.38 year(s)
