

User data sheet for authentication device related to Electra service

Customer Data

Company name:

Tax number:

as Client and K&H Bank Zrt. (having its registered office at 1095 Budapest, Lechner Ödön fasor 9, registered by the Metropolitan Court of Budapest as court of registration under Cg.01-10-041043) with reference and in supplement to the Framework Agreement and the „Service request and / or modification” document attached to it / contract concerning the use of Banking Services Requiring Electronic Identification (hereinafter altogether: „**Contract**”) concluded by and between them, hereby agree as follows regarding the Electra service requested by the Client. The present data sheet shall form an integral part of the Contract.

The Client expressly acknowledges, that the users appointed by the Client can access Electra service with all those authentication devices, which were provided to the users by the Bank earlier. The application can be used with devices running Android, iOS or Windows operating systems. The necessary software can be downloaded from their respective application stores or – for Windows operating system – from the Bank’s website. In case of Windows operating system the mobile phone number is only needed for registering the application, but not for its use afterwards.

User information

The modifications requested herein apply to Users identified in this section only. Authentication devices of other Users not affected by these modifications will remain unchanged in accordance with previous settings, with the same content.
